

EXERCISE #8 CREATING A WEB PHOTO ALBUM

Complete this exercise by creating a web photo album in Photoshop of a folder of images.

Making a Web photo gallery/contact sheets

Place all of your images in a file folder and create an empty file folder for final images

FILE>AUTOMATE>WEB PHOTOS GALLERY

look at options for layout for different things you can change about the pg

set source by choosing the folder with images

set destination by choosing a folder for your images

say OK and Photoshop makes thumbnails of your images

and html reference pages which can be edited in Dreamweaver

don't move files within folders or they loose their links

Actions

Actions are like macro processor, that allows you to record, and automatically repeat, several commands in sequence. You can even assign and action to a key for a shortcut.

Image Ready's action palette is slightly different from Photoshop.

Droplet and batch commands in palette in Image Ready but under FILE>AUTOMATE in Photoshop.

Practice making action for make 72 dpi and RGB.
